

LITKOVSKA iNspired RESILIENCE

LITKOVSKA INSPIRED RESILIENCE is a project born in the framework of the collaboration between the Italian textile producer **INSETA** and the Ukrainian fashion designer **LITKOVSKA**.

INSETA presents to fashion market beautiful and innovative fabrics coming out from creative experiences to build up dreams, emotions, style.

LITKOVSKA is a contemporary Ukrainian brand founded by Lilia Litkovskaya in 2009 that has been steadily gaining visibility on the global fashion stage. The brand has received several awards and recognition from the most esteemed circles within the fashion community. At the heart of LITKOVSKA lies the philosophy that “There is no wrong side”, inside out is just as valuable as what is seen on the surface.

INSETA, which has always been sensitive to creativity in all its forms, supports LITKOVSKA in her experimentation and provided her with its fabrics for the new collection “rebirth” ss24 showing on Paris Fashion Week – 27 September 2023.

The project LITKOVSKA INSPIRED RESILIENCE would like to convey the inherent value and strength of Art struggling to assert itself and surviving the ugliness of pain and misery. Fashion is nothing but an expression of Art, and therefore, as Beautiful, able to confront and survive the torments of the world.

The storytelling of this collaboration is outlined step by step on INSETA Instagram profile and website inseta.it/en/litkovska
